

# Shutter Sensors

## SPS-1450S

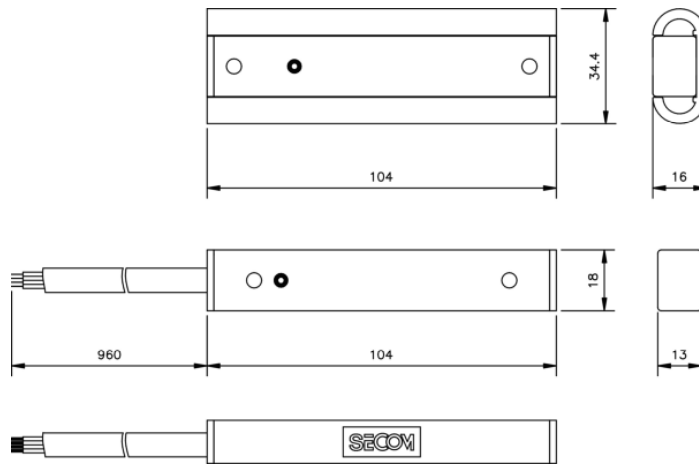

## Product Specifications

### 1. Features

- A magnetic switch for shutters using high endurance Aluminum shells
- Flexible Aluminum brackets provided easy installations on any type of shutter door without damaging it
- Built-in biased magnet to prevent defeat attempts from outside SPST
- Strong rare earth magnet
- NC type (open on magnet approach) switch connectable to loop circuit of any control panel
- Epoxy molded water proof structure
- Contact resistance under  $6\Omega$   
Insulation resistance over  $10M\Omega$  at DC250V

### 2. Dimensions

### 3. Specifications

Model	Operating Gap	Contact Type	Insulation Resistance	Contact Resistance	Operating Condition
